## CERTIFICATIONS

## PRODUCTION HIGHLIGHTS

### Quality

Our Quality Control System, continuously improved over our 40 years of establishment, is comprised of thorough material, process and product checks. Our focus on an ever-decreasing rework and repair rate, allowing us to offer our services to any AQL Acceptable Quality Limit requirement.

### Fabric Inspections

We Inspect all incoming fabric through our fabric inspection machine following the JCP 4- Point system. All accessories and trims are inspected for quality within 24 hours of receipt.

### Metal Detection

We Utilize Hashima Metal Detection machine as a safety check though all our products prior to final packaging

### Design & Development

We assist our clients in creating fit and designs for garments. We offer a vast variety of choices of fabrics, accessories and packaging methods (flat pack, boxed pack, hanging garments, etc.).

### Production Capacity

Our facility runs 5 lines manufacturing units, with a monthly capacity in the range of 130,000 - 150,000 pieces.

## CORPORATE SOCIAL RESPONSIBILITY

Our Commitment to our clients stems from our sense of Social Responsibility extends to the wellbeing of our 9,80+ employees , their families and the environment.
